KFP expands its European business with new facility in Germany

Abingdon, Oxford. 6th June 2023 - KFP expands its European business with new facility in Germany.

KFP Total IT Solutions (KFP) is pleased to announce the further expansion of their operation into mainland Europe with the signing of new office and warehousing space at Segro Park Ingolstadt, Germany.

The all new state-of-the-art 27,500 sq. ft (2,550 sq. m) unit is located on Segro's first urban multi-tenant Park in southern Germany. Segro Park Ingolstadt has a total of 30,600 square meters of space comprising of three warehouses complexes and includes light industrial property with a larger proportion of office and service space.

John Moss, KFP's Founder & CEO commented "Our Germany facility gives us our fifth office which will enable us to support our existing and new European customer base." adding "We are confident that operating from this site will help us provide even higher levels of world class service as both support and stock is never too far from our customers. Ultimately customer service and satisfaction will be enhanced because, if stock failures occur, our technical teams and break-fix solutions ensure minimal downtime for our customers operation."

Steve Chambers, Head of Sales & Marketing at KFP commented "This office and service space mix is ideal for the requirements of KFP as it provides our customers with a dedicated area of support, including technology staging, storage, warehousing and office space." adding "In addition we are centrally located in the heart of Bavaria, in the "InterPark" industrial area, with ideal connections to greater Munich. This new European hub puts KFP in a great position to support its ever-growing customer base."

The new Segro Park was built according to modern standards for sustainable, ecological and energy-conscious construction. Various sustainable measures are used in the buildings, such as green roofs, charging stations for electric vehicles, photovoltaics for green electricity and intelligent LED lighting systems.

We are hoping our new facility will open to our customers by Autumn 2023 and will release further details nearer this time.
